Jeana Rose Mathis

Full Stack Developer

Enthusiastic Software Developer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of front-end and back-end web development and training in the MERN stack. Motivated to learn, grow and excel in web development.

Education

Full Stack Developer Coding Boot Camp

Nov 2020- Current

Georgia Institute of Technology - Atlanta, GA

- Create applications using object-oriented programming
- Deploy RESTful applications through React using functional components, hooks, and state
- Experience building apps using a model-view controller, specifically with Handlebars, Express, and MySQL
- Create databases using MySQL and MongoDB
- In touch with current UI/UX preferences
- Ensure a seamless user experience by implementing a design that is thoughtful, void of distraction, and guides the user to the desired functionality
- Expertise using DOM manipulation to dynamically create elements on the page using jQuery
- Exceptional collaboration with team members via verbal communication, GitHub, and project management tools such as Asana and Jira
- Ability to understand and pass unit tests

Bachelor of Science: Public Health

Aug 2015- May 2020

University of Georgia - *Athens, GA*

Work History

Software Developer and Solutions Analyst
April 2020- Oct 2020

Fathom Technology Partners, Alpharetta, GA

- Performed software testing to uncover bugs and troubleshoot deficiencies in user experience prior to application launch.
- Created digital marketing tools and designs that were brand conscious
- Created several web applications using primarily HTML, CSS and JavaScript

Intern
Sept 2019- May 2020

Fathom Technology Partners, Alpharetta, Georgia

- Created digital marketing products and designs for a start up
- Used KPIs and analytics to better understand an audience and adjusted digital marketing strategy based on the data
- Tested mobile and web applications to determine any bugs and used Excel to track known bugs and describe expected outcomes at each point in the application
- Maintained a website for a non-profit using Word Press
- Created and implemented a process for installing 800 cred card terminals at 180 corporate restaurants including detailed documentation, project management, and tracking
